This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

**Recommendations (optional):** In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

**Security Audit Recommendations — Botium Toys**

Based on the risk assessment, Botium Toys should prioritize implementing least privilege access controls and separation of duties to prevent unauthorized access to sensitive customer and employee information.

The organization should implement encryption for customer payment data, strengthen password policies, and introduce a centralized password management system.

Additionally, Botium Toys should install an intrusion detection system (IDS), establish disaster recovery procedures, and implement regular backups of critical data.

The IT department should also improve asset inventory management and establish a consistent maintenance schedule for legacy systems.

These improvements will help reduce security risks, strengthen regulatory compliance, and improve the organization's overall security posture.
